

**You requested it, we designed it...** Available to you today, April 5, 2010, Iroquois has implemented a new Help System within IOL. The system features over 60 screens to assist you with the IOL application. From nominations to invoicing, your questions can be answered by accessing these screens.

We invite all IOL users, from beginners to pros, to take advantage of this Help System. Any questions or feedback would be greatly appreciated and will allow us to improve the help screens. To send your feedback, click on Help > Suggestion Box. Enter your suggestion and press the send button.

The Help System can be accessed by logging into IOL and clicking on Help > Help Topics. Alternatively, by pressing F1 you can access the screens from anywhere within IOL. The screens may be browsed using the Table of Contents (default), index panel or search panel on the left of the screen.

Additional Features coming soon...

- Help button shortcuts within each IOL screen (Nominations, Confirmations, Capacity Release, etc.)
- More help screens
- More tutorials
