

The Iroquois Insider... 6th Edition

L8er To The DAS From IGTS INV

(Say Goodbye to the Deferred Asset Surcharges on your Iroquois Gas Transmissions System Invoice)

From the tech savvy to the avid reader, we spelled it out with you in mind. Our DEF ASSET SURCHARGE found on most every invoice for the past 19 years has expired. As of November 1, 2011 we will no longer charge that \$.0003, \$.0002 and \$.0005 commodity per dekatherm. That's right folks- it just became even more economical to transport your gas on Iroquois. Remember everything we do we do it 4U!

Copy That!

We heard you loud and clear! On October 25th we rolled out the **Copy Offer** function in capacity release. Requested by our releasing shippers, this feature was designed to streamline the *create offer* process. Utilizing this new feature is simple. Highlight the offer you wish to copy and select **copy offer**. You will then be given the opportunity to review the offer and either *copy and save* or *copy and continue*. If you select *copy and continue* you will be directed to the capacity release wizard where the terms and conditions will be populated from the original offer. At this point, you should follow the steps of the wizard to confirm the information is accurate or alter it to reflect any changes. Do you *copy that*? Please contact Helena Clancy with any comments, questions or suggestions on this topic.

They Came, They Trained, They Conquered (... or hopefully broke even)

We'd like to extend a special "Thank You" to all of you who made our IOL Training sessions at Mohegan Sun this October a huge success. It was wonderful to meet some new schedulers and re-connect with some old friends. We now have our IOL Training Manuals available in PDF format. In addition, if you would like training for yourself or your group, "Live Meeting" might be the perfect fit. Please contact Kate or Helena with your request.
